PROFILE

First Class law graduate turned AI engineer - I understand legal workflows and I ship the systems that fix them. Most recently at Qanooni AI (Dubai-based, remote), building enterprise legal AI: document-processing pipelines and QCounsel, a 26-tool AI agent running inside Microsoft Word. I build production AI systems and the evaluation pipelines that keep them honest, including a citation-hallucination benchmark spanning 6 frontier models. Previously sole engineer at a legal document automation startup.

EXPERIENCE

Qanooni AI · Software Engineer (Legal AI) - Dubai-based, Remote

October 2025 – June 2026

Built production AI systems for legal drafting and review at scale.

- Integrated DocETL pipeline orchestration (Split → ParallelMap → CodeMap → Reduce).
- Shipped multilingual legal-AI evaluation: English and Arabic evaluation splits, jurisdiction-aware judge prompts, pipeline evaluations, and prompt optimization.
- Built QCounsel, a 26-tool Pydantic AI agent running inside Microsoft Word for legal research, drafting, and litigation workflows; designed its evaluation framework, tool-routing classifier, and clarify-vs-act logic.
- Production AI ops: feedback-triaged bug fixes from langfuse trace IDs; span-level latency debugging; PostHog vs DB telemetry reconciliation for apply-rate analysis.
- Stack: Python, FastAPI, Pydantic AI, DocETL, Langfuse, Claude API, pytest, Ruff, Pyright.

CaseSimpli Legal Tech Solutions · Lead Software Engineer - Remote

November 2024 – October 2025

Led engineering on an AI-assisted legal document automation platform.

- Built AI-assisted legal document automation system that **reduced contract drafting time by 30%** while preserving lawyer-in-the-loop oversight.
- Built **RAG pipelines** for statutory materials and precedents, emphasizing citation grounding and controlled outputs.
- Developed AI-powered legal chatbot; improved case analysis efficiency by 25%.
- Collaborated with legal professionals to align system behavior with substantive legal expectations.
- Stack: Python (FastAPI), Next.js, PostgreSQL, OpenAI Assistants, Azure.

Data Quotient Hub · Frontend Web Engineer (Part-Time)

April 2025 – October 2025

- Shipped responsive enterprise UIs in Next.js + TypeScript for a data-management product.
- Worked with backend teams to integrate APIs, ensure system reliability, and improve performance.

Glory Schools, Egbedi · ICT Manager & Instructor

2022 – 2024

- Built and maintained digital examination and e-learning platforms (99.9% uptime); implemented JWT authentication and role-based access control.
 - Delivered a school management platform (Python + React + Docker; 1,400+ books, 3,000+ videos; 35+ PRs).
 - Taught practical programming and ICT.
-

SELECTED PROJECTS

Capit - Glass-box image captioner · [Live demo](#) · [GitHub](#) · **Model (HF)** Show, Attend and Tell trained from scratch (frozen ResNet-50 encoder, Bahdanau attention + LSTM decoder, Flickr8k): BLEU-4 23.63 / CIDEr 62.80 (beam 5, Karpathy split). UI exposes per-word attention heatmaps and the beam candidates it rejected, with BLIP alongside as a closed-box contrast. Deployed: HF Space backend serving a self-contained model artifact.

Givemore - MovieLens recommender · [Live demo](#) · [GitHub](#) Item-item collaborative filtering (adjusted cosine, IUF-weighted) blended with TF-IDF content similarity and a Bayesian popularity fallback - precomputed offline into a 9 MB SQLite artifact served by a zero-ML-dependency FastAPI; framework-free TypeScript frontend.

Legal Citation Hallucination Benchmark · [GitHub](#) Async LLM evaluation pipeline measuring citation hallucination across 6 frontier models × 328 prompts (English + Arabic). Pluggable providers, pydantic schemas, citation-fabrication rubric, resume capability. Modeled on Stanford RegLab's legal_hallucinations.

EDUCATION

ESCAE Benin University, Cotonou · LLB Law, First Class Honours *September 2018 – August 2022* GPA: 4.92/5.0 (top 1% of cohort). Best Graduating Student, Faculty of Law. Student Senate President (Leadership Award). Thesis: *“Capital Punishment in Nigeria: An Examination of Human Rights Law and its Locus Standi in International Society.”*

WorldQuant University · Master of Science, Financial Engineering In progress (2025–) Current coursework includes Financial Econometrics (cointegration, ECM/VECM, LASSO, Diebold-Mariano testing).

TECHNICAL

AI / ML: RAG pipelines · Agentic systems · PyTorch · Recommender systems · Langfuse · DocETL · LangChain · Hugging Face · Claude API · OpenAI API

Languages & Frameworks: Python (FastAPI, SQLAlchemy, Pydantic, pytest) · TypeScript (React, Next.js, Vite) · SQL

Infrastructure & Data: PostgreSQL · Redis · Kafka · RabbitMQ · SQLite · Chroma · FAISS · Docker · Azure · AWS

CERTIFICATIONS

- **Foundations of Financial Engineering** - WorldQuant University
- **Fundamentals of LLMs** - DeepLearning.AI
- **Advanced Learning Algorithms** - Coursera ML Specialization

- **Unsupervised Learning, Recommenders, Reinforcement Learning** - Coursera ML Specialization
 - **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** - September 2025
 - **Applied Data Science Lab** - WorldQuant University
 - **Clio Certified Administrator** (Legal Practice Management) - September 2025
-

LEADERSHIP

Student Senate President, ESCAE Benin University (2019–2022) Elected to represent 3,000+ students across all faculties. Led advocacy on academic quality, infrastructure, and student welfare. Recognized with Leadership Award upon graduation.

LANGUAGES

English (Full Professional Proficiency) · Yoruba (Native)
